5.2.11. SPIRE Product Level 0.5 - Photometer Detector Timeline

<i>product (type="PDT", description="Photometer Detector Timeline")</i>	
Meta- data	
StringParameter	telescope (description="Name of telescope")
StringParameter	instrument (description="Instrument attached to this product")
StringParameter	subsystem (description="Instrument Subsystem")
StringParameter	source (description="TM source packet name")
StringParameter	creator (description="Generator of this product")
StringParameter	object (description="Target name")
StringParameter	observer (description="Observer name")
StringParameter	proposal (description="Proposal name")
LongParameter	obsid (description="Observation identifier")
LongParameter	odNumber (description="Operational day number")
DateParameter	creationDate (description="Creation date of this product")
DateParameter	startDate (description="Start date of this product")
DateParameter	endDate (description="End date of this product")
StringParameter	aot (description="AOT Identifier")
StringParameter	aorLabel (description="AOR Label as entered in HSpot")
StringParameter	cusMode (description="CUS observation mode")
StringParameter	instMode (description="Instrument Mode")
StringParameter	obsMode (description="Observation mode name")
StringParameter	pointingMode (description="Pointing mode")
StringParameter	biasMode (description="Bias mode")
DoubleParameter	biasFreq (description="Bias frequency", quantity="Hz")

StringParameter	elecSide (description="Electronic side", quantity="Hz")
StringParameter	modelName (description="Model name attached to this product", quantity="Hz")
StringParameter	formatVersion (description="Version of product format", quantity="Hz")
StringParameter	missionConfig (description="Mission configuration", quantity="Hz")
DoubleParameter	equinox (description="Equinox of celestial coordinate system", quantity="Hz")
StringParameter	raDeSys (description="Coordinate reference frame for the RA and DEC", quantity="Hz")
DoubleParameter	ra (description="Actual Right Ascension of pointing", quantity="deg")
DoubleParameter	raNominal (description="Requested Right Ascension of pointing", quantity="deg")
DoubleParameter	dec (description="Actual Declination of pointing", quantity="deg")
DoubleParameter	decNominal (description="Requested Declination of pointing", quantity="deg")
DoubleParameter	posAngle (description="Position Angle of pointing", quantity="deg")
DoubleParameter	pmRA (description="Target's proper motion RA (arcsec/yr) as given by the observer", quantity="arcsec a-1")
DoubleParameter	pmDEC (description="Target's proper motion Dec (arcsec/yr) as given by the observer", quantity="arcsec a-1")
StringParameter	origin (description="Site that created the product", quantity="arcsec a-1")
StringParameter	type (description="Product Type Identification", quantity="arcsec a-1")
StringParameter	description (description="Name of this product", quantity="arcsec a-1")
StringParameter	engConvCalVersion (description="Version of the calibration tree used in the engineering conversion", quantity="arcsec a-1")
StringParameter	level (description="The level of the product", quantity="arcsec a-1")
LongParameter	bbid (description="Building Block Identifier", quantity="arcsec a-1")
StringParameter	bbTypeName (description="Building block type name", quantity="arcsec a-1")
StringParameter	signalTable (description="Name of the signal table", quantity="arcsec a-1")
LongParameter	maskDead (description="Mask value for dead channel", quantity="arcsec a-1")
LongParameter	maskMaster (description="Mask value for master bit", quantity="arcsec a-1")
LongParameter	maskNoisy (description="Mask value for noisy channel", quantity="arcsec a-1")

LongParameter	maskSlow (description="Mask value for slow channel", quantity="arcsec a-1")
BooleanParameter	adcErrFlag (description="Flag for presence of ADC Latch errors", quantity="arcsec a-1")
DoubleParameter	ratioTruncatedPLW (description="Maximum ratio of out-of-range values to total number of values in PLW data", quantity="arcsec a-1")
DoubleParameter	ratioTruncatedPMW (description="Maximum ratio of out-of-range values to total number of values in PMW data", quantity="arcsec a-1")
DoubleParameter	ratioTruncatedPSW (description="Maximum ratio of out-of-range values to total number of values in PSW data", quantity="arcsec a-1")
DoubleParameter	ratioTruncatedPTC (description="Total fraction of out-of-range values for PTC", quantity="arcsec a-1")
LongParameter	maskAdcLatch (description="Mask value for possible ADC latchup error", quantity="arcsec a-1")
LongParameter	maskTruncated (description="Mask value for ADC conversion truncation", quantity="arcsec a-1")
LongParameter	maskUncorrectedTruncation (description="Mask value for uncorrected ADC conversion truncation", quantity="arcsec a-1")
DoubleParameter	ratioInvalidTimes (description="Fraction of invalid sample times", quantity="arcsec a-1")
LongParameter	maskInvalidTime (description="Mask value for invalid sample time", quantity="arcsec a-1")
DoubleParameter	timeOffset (description="Time offset added to correct the shift between detectors and pointing timing", quantity="s")
DoubleParameter	timeDrift (description="Time drift added to correct the shift between detectors and pointing timing", quantity="ms/min")
BooleanParameter	invalidOffsetFlag (description="If true, offsets are from a previous observation", quantity="ms/min")
BooleanParameter	rcRollApp (description="RC roll correction applied", quantity="ms/min")
DoubleParameter	subkTempDrift (description="Drift measured by the SubK temperature probe", quantity="K")
LongParameter	maskGlitchL1Detected (description="Mask value for first level glitch detected", quantity="K")
LongParameter	maskGlitchL1NotRemoved (description="Mask value for first level glitch detected and not removed", quantity="K")
LongParameter	maskNotChoppedToSky (description="Mask value for channel not chopped to sky", quantity="K")
StringParameter	scanDirection (description="nominal, orthogonal or scanab", quantity="K")
DoubleParameter	plwBiasAmpl (description="PLW bias amplitude", quantity="V")
DoubleParameter	pmwBiasAmpl (description="PMW bias amplitude", quantity="V")
DoubleParameter	pswBiasAmpl (description="PSW bias amplitude", quantity="V")
DoubleParameter	ptcBiasAmpl (description="PTC bias amplitude", quantity="V")

DoubleParameter	plwBiasPhase (description="PLW bias phase", quantity="rad")
DoubleParameter	pmwBiasPhase (description="PMW bias phase", quantity="rad")
DoubleParameter	pswBiasPhase (description="PSW bias phase", quantity="rad")
DoubleParameter	ptcBiasPhase (description="PTC bias phase", quantity="rad")
StringParameter	scanSpeed (description="Speed of scan", quantity="rad")
LongParameter	scanLineNum (description="Scan line number", quantity="rad")
LongParameter	numberBadVoltageOffsetPLW (description="Number of PLW bolometers with bad voltage offset resets", quantity="rad")
LongParameter	numberBadVoltageOffsetPMW (description="Number of PMW bolometers with bad voltage offset resets", quantity="rad")
LongParameter	numberBadVoltageOffsetPSW (description="Number of PSW bolometers with bad voltage offset resets", quantity="rad")
DoubleParameter	ratioPhotFirstLevelGlitchesPSW (description="Maximum ratio of number of flagged samples over number of data samples in the detectors of the PSW array", quantity="rad")
DoubleParameter	ratioPhotFirstLevelGlitchesPMW (description="Maximum ratio of number of flagged samples over number of data samples in the detectors of the PMW array", quantity="rad")
DoubleParameter	ratioPhotFirstLevelGlitchesPLW (description="Maximum ratio of number of flagged samples over number of data samples in the detectors of the PLW array", quantity="rad")

5.2.53. SPIRE Product Level 0.5 - Nominal House Keeping Timeline

<i>product (type="NHKT", description="Nominal House Keeping Timeline")</i>	
<i>Metadata</i>	
StringParameter	telescope (description="Name of telescope")
StringParameter	instrument (description="Instrument attached to this product")
StringParameter	subsystem (description="Instrument Subsystem")
StringParameter	source (description="TM source packet name")
StringParameter	creator (description="Generator of this product")
StringParameter	object (description="Target name")
StringParameter	observer (description="Observer name")
StringParameter	proposal (description="Proposal name")

LongParameter	obsid (description="Observation identifier")
LongParameter	odNumber (description="Operational day number")
DateParameter	creationDate (description="Creation date of this product")
DateParameter	startDate (description="Start date of this product")
DateParameter	endDate (description="End date of this product")
StringParameter	aot (description="AOT Identifier")
StringParameter	aorLabel (description="AOR Label as entered in HSpot")
StringParameter	cusMode (description="CUS observation mode")
StringParameter	instMode (description="Instrument Mode")
StringParameter	obsMode (description="Observation mode name")
StringParameter	pointingMode (description="Pointing mode")
StringParameter	biasMode (description="Bias mode")
StringParameter	elecSide (description="Electronic side")
StringParameter	modelName (description="Model name attached to this product")
StringParameter	formatVersion (description="Version of product format")
StringParameter	missionConfig (description="Mission configuration")
DoubleParameter	equinox (description="Equinox of celestial coordinate system")
StringParameter	raDeSys (description="Coordinate reference frame for the RA and DEC")
DoubleParameter	ra (description="Actual Right Ascension of pointing", quantity="deg")
DoubleParameter	raNominal (description="Requested Right Ascension of pointing", quantity="deg")
DoubleParameter	dec (description="Actual Declination of pointing", quantity="deg")
DoubleParameter	decNominal (description="Requested Declination of pointing", quantity="deg")
DoubleParameter	posAngle (description="Position Angle of pointing", quantity="deg")
DoubleParameter	pmRA (description="Target's proper motion RA (arcsec/yr) as given by the observer", quantity="arcsec a-1")
DoubleParameter	pmDEC (description="Target's proper motion Dec (arcsec/yr) as given by the observer", quantity="arcsec a-1")
StringParameter	origin (description="Site that created the product", quantity="arcsec a-1")
StringParameter	type (description="Product Type Identification", quantity="arcsec a-1")
StringParameter	description (description="Name of this product", quantity="arcsec a-1")
StringParameter	engConvCalVersion (description="Version of the calibration tree used in engineering conversion", quantity="arcsec a-1")
StringParameter	level (description="The level of the product", quantity="arcsec a-1")
LongParameter	bbid (description="Building Block Identifier", quantity="arcsec a-1")
StringParameter	bbTypeName (description="Building block type name", quantity="arcsec a-1")
DoubleParameter	timeOffset (description="Time offset added to correct the shift between detectors and pointing timing", quantity="s")
StringParameter	scanDirection (description="nominal, orthogonal or scanab", quantity="s")
StringParameter	scanSpeed (description="Speed of scan", quantity="s")
BooleanParameter	coolerBurpDetected (description="Indicates a cooler burp", quantity="s")
