## SPIRE Internal Documents Archive

This folder contains an archive of all available SPIRE Instrument and Control Centre registered documents. The archive is provided as-is.

The list of filenames, together with an attempt to extract some metadata from the files (PDF, MS Word, etc) are available in [this CSV table](#) or [this Excel spreadsheet](#).

In some cases the same document is available in different versions. There was no attempt made to clean up folders or to keep only the latest version of a given document.
