

The way forward

- Time allocation / scheduling
 - Loosen constraints on TOO and monitoring?
 - How shall we allocate large/legacy (>Ms) proposals?
 - Via normal TAC? Special call? DDT? User group? (survey to choose?)
Letters of intent?
 - Any time limitation on total large programme time?
 - Limitation on number of years?
 - Data public immediately?
- New Science?
 - Do we want to endorse any particular science (here and now)?
 - What does Norbert need?
